RE: Underlayment laps (overlaps)

To whom it may concern,

It is my understanding there is a question about proper underlayment laps at the hips, ridges, and valleys.

IKO underlayment must be applied with a minimum of 6-inch laps on both sides at the hips, ridges, and valleys. For side and end laps, please follow the specific IKO underlayment application instructions.

Thank you for your interest in IKO.

Sincerely,

Allan Lawrence
